

Sustainable fashion

slow fashion

Day by day there is more need to improve textile materials to manufacture sustainable garments and products that reduce their impact on the environment.

The purpose is to reduce resources in production, reuse, use organic materials and manufacture under fair production practices.

Contribute to environmental care by dressing in fashion!

- Prefer to buy timeless clothes.
- Swap clothes with friends.
- Fix and/or modernize the clothes you already have.
- Follow care and washing instructions.
- Before buying, check the composition of its fibers and resistance.

Sustainable fashion encourages a more responsible and ethical attitude towards consumption

Your skin and the sun

The sun's rays help you assimilate vitamin D, benefiting your bones and the immune system; However, its excess UVA and UVB ultraviolet rays can cause damage to the skin such as:

- Premature aging
- Skin burns
- Cancer

Prevent damage to your skin

Avoid exposing yourself to the sun's rays from 10 a.m. until 4 p.m.

Use sunscreen with SPF +30 ALL year long, even at home or in the office to protect against blue light from monitors from electronic devices.

Do not expose **babies under 6 months** to the sun, or put sunscreen on them.

Follow the instructions for using sunscreen and reapplying every 2 hours approximately.

Wear UV-blocking glasses to protect your eyesight.

**Skin health is important too!
Prevention is the best
alternative**
